

A division of Industrial TurnAround Corporation, ITAC FPS is a turnkey fall protection integrator providing design/build construction services including site assessments, engineering, installation, testing and training. Our certified staff of engineering, safety and construction professionals is committed to helping clients minimize the risks of fall related hazards to protect their most valuable assets—their employees.

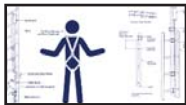

Services

At ITAC FPS, clients depend on our flexibility and expertise to provide invaluable fall protection solutions for company projects large and small.

Site Assessment

ITAC FPS meticulously identifies, prioritizes and compiles site-specific fall hazards into a hazard summary report providing management with an objective way to prioritize and mitigate hazards.

Engineering

Our engineers analyze existing structures and design new supporting elements as needed to develop a solution based on the “Hierarchy of Controls”.

Installation

ITAC FPS’s highly trained, industry specific installation crews travel the nation to install, inspect and certify fall protection systems and related components.

Testing

ITAC FPS offers independent third party testing for engineered equipment as well as on-site testing as appropriate for installed systems.

Training

ITAC FPS provides “At Risk” Worker, OSHA Competent Person and OSHA Qualified Person Training courses to thoroughly educate workers on the latest industry standards and practices.

Equipment

The diverse line of safety and fall protection devices offered by ITAC FPS exceeds all applicable legislative requirements and provides benchmarks for comfort, safety and quality. ITAC FPS is a full line distributor and certified installer for numerous major equipment manufacturers. Internal fabrication capabilities also allow for custom, client specific equipment.

Horizontal Lifelines
Rigid Rails
Platforms & Gangways
Guardrails

Vertical Lifelines
Ladders
Anchorage Points
Harnesses & Lanyards

Experience

With over 50 years of combined fall protection expertise, ITAC is a leading provider of safety solutions for a diverse client base, including several Fortune 100 companies. Whether your business is government or private, industrial or commercial, ITAC FPS can assist in the engineering, procurement and installation of life-saving fall protection systems.

Professional Qualifications and Affiliations

Each of the ITAC FPS engineers is a designated OSHA Competent and Qualified Person active in fall protection related organizations such as the National Safety Council (NSC), the American Society of Safety Engineers (ASSE) and the International Society for Fall Protection (ISFP).
