

ITAC FPS- Fall Protection Training Course Outline

Course Title: Fall Protection Competent Person Refresher Training

Location: ITAC Training Center: Chester, VA *or* Client Site

Duration: 8 hours (1 Day)

Description: This course is strictly limited to those individuals who have completed a (2) day, (16) hour competent person course in the last (3) years. This course is intended for individuals whose job responsibilities require them to actively participate in the rules, training, and the execution of site-specific fall protection directives at their work site or facility. This program ensures attendants are made aware of any new industry changes since prior training dates, reviews general 'competent person' responsibilities, and examines a site's fall protection program success

This is an interactive session with a visual presentation and thorough in-class discussion. Be prepared to speak up!

References: ANSI Z359.2 (2007), Z359.4 (2013)

Content:

- Brief case study of a fall protection accident report or product recall
- Assessment of current company fall protection program: problems and successes
- Review changes in leading fall protection regulations
- Discuss hierarchy of controls
- Review classes of fall protection equipment
- Review operating principles of fall protection equipment
- Discuss new products
- Hands-on practice calculations

A spiral bound course manual will be issued to each student.
