

Aerial Lifts Trainer Certification

Learn how to train and qualify aerial boomlift and scissor lift operators in our Aerial Lifts Trainer Certification Program. Trainees will receive in-depth instruction on mobile elevating work platforms (MEWPs) as well as extensive instruction on how to effectively train operators. Each trainee's knowledge and demonstrated skills in all aspects of the program are evaluated and graded prior to certification. This program is a comprehensive, cost effective method of ensuring that your operators receive training and evaluation that meets or exceeds all applicable government regulations and referenced industry standards.

This program isn't make or model specific and covers concepts common to all types of aerial lifts including JLG, Genie and Skyjack. Register in an Aerial Lifts Trainer Certification program today and find out how you can achieve the highest level of regulatory compliance in all of your in-house equipment safety training.

Program Duration: 3 days (7:30AM – 5:00PM)

Equipment Addressed:

- Aerial Boomlifts
- Scissor Lifts

Program Structure:

- 70% Classroom Theory Training
- 30% Practical Hands-on Training
- **Program Capacity:** Maximum of 12

Program Outline:

Day 1

- Introduction and program requirements
- Trainer pre-test
- Program overview and objectives
- Review of applicable regulations and industry standards
- Classroom and practical instructional techniques
- Aerial Lift (ALP) Reference Manual review
- ALP Operator Theory Test review
- Homework assignment

Day 2

- Review Day 1
- Theory presentation

- Equipment pre-use inspection
- Practical training skills
- Practical training exercises
- Operator Practical Evaluation process
- Practical evaluation exercises (hands-on)
- Homework assignment

Day 3

- Program review
- Theory presentation
- Practical evaluation exercises (hands-on)
- Documentation/Certification procedures
- ALP Trainer Theory Test
- Establishing site & equipment-specific operator training program and lesson plan
- Final Written Trainer Test
- Requalification and Familiarization requirements
- Questions and wrap-up

Important Details:

- Trainees must have functional English language reading, writing and speaking skills.
- Trainees will be sent an Aerial Lifts Reference Manual prior to the program for review and completion. Each trainee must bring their completed manual with them to the program.
- Trainees are strongly encouraged to bring their own safety harness and fixed fall restraint lanyard (4-6 ft adjustable).
- Trainees should have experience working on and/or with the equipment addressed in this program.
- Operator credentials are not issued during this program. A successful trainee will be qualified as an IVES Certified Trainer.
